Behavior: Normal

Additional observations by the inspectors: Well developed, rectangular type. Long neck a bit vertical. The back is a bit weak. Loins are well-muscled. His croup is short and sloping. Stance of forelegs is okay. Hindlegs are a bit straight. Walk is short and his first steps were irregular but better later. Trot is short and has to be more powerful and elastic. Canter has a good stride and is well-balanced with good posture. Very good take-off. Very good technique in foreleg with good reflexes. Very careful and seems to have a lot of scope.

Total Points: 108.5

Decision: Approved
