**STAGE 3 PERFORMANCE TEST**

This is a complete stallion. He has developed very well and grown since his Stage 1 Inspection eighteen month ago, which took place shortly after his arrival in Ireland. His scores for walk, trot, canter, technique, scope, reflexes, balance, and rideability have all improved. His conformation is more than sufficient across every trait except the hind leg, which is a little sickle-hocked and tied-in. His left hock is capped; this is a cosmetic blemish with no clinical or hereditary significance, and it will not impact his sport career. His canter is balanced, and the length of stride and impulsion contribute to his very good jumping scores. In particular, his reflexes and technique are extraordinary. His rideability and willingness to work for and with the rider are good. He should be used by both showjumping and eventing breeders. He should suit a wide variety of mares, including those in need of modern athleticism and showjumping traits. The mare should bring a good hindleg to the pairing, along with long lines and some blood in her athletic expression. The foals seen by the inspectors have been modern, correct, and blood-infused.

**Stable Behavior:** Good stable behavior. No stable vices observed.

**Behavior with Humans:** Good behavior toward humans.

**Predicates:** D-OC, D-WFFS1, E+. Approved by ZANG.

\*Interior: character/temperament + willingness to work, equally weighted

\*Excellent, Good, or Acceptable

Inspectors: Marcel Beukers, Thomas Reed, Wim Versteeg, Claire Wood

**Decision: APPROVED**
